*"As a dermatologist, I'm always looking for laser treatments that strike the right balance between efficacy and patient comfort. With ResurFX, we have a solution that improves facial and body texture with minimal discomfort and downtime."*

—  
Dr. Arielle N. B. Kauvar, MD,  
Director New York Laser & Skin Care

# CoolScan™ for Better Patient Outcomes

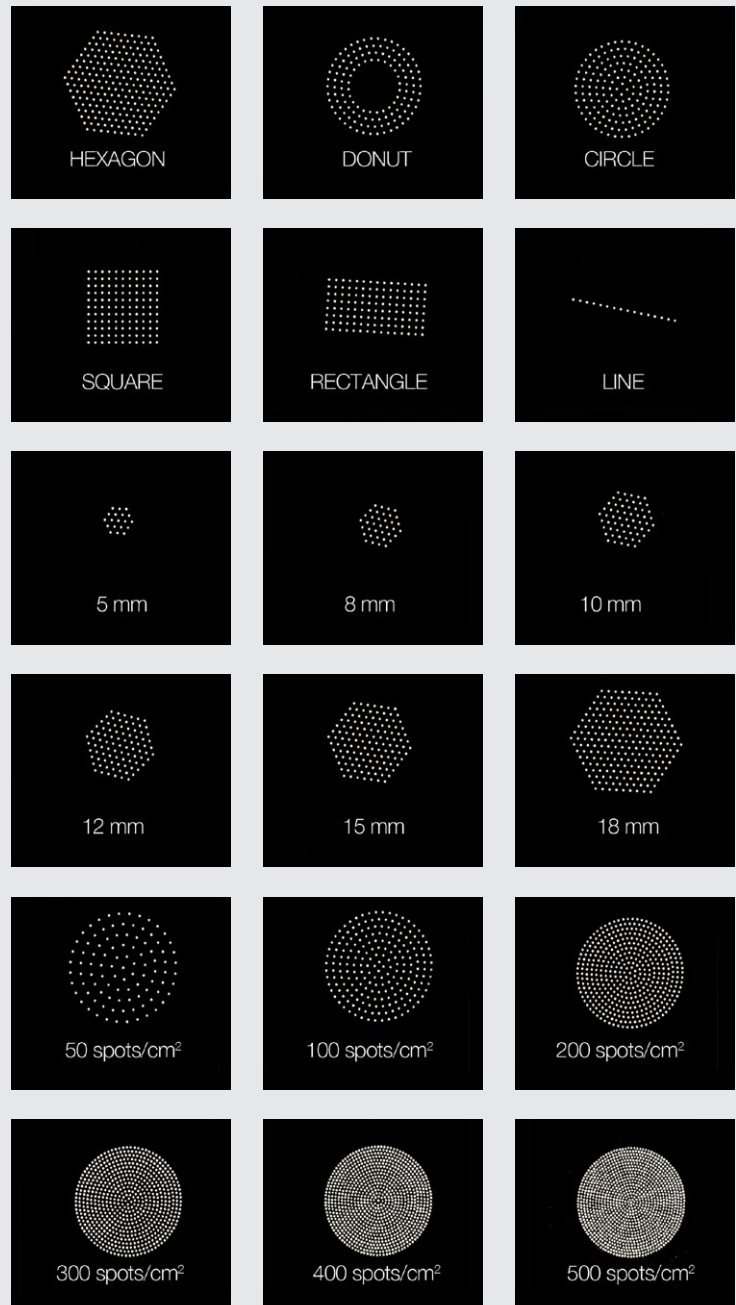

## The only true fractional non-ablative technology

- State-of-the-art CoolScan scanner for customizable treatment
- Patent pending algorithm ensures precise, homogeneous and safe energy delivery
- With up to 20% coverage in one pass
- The only one with continuous contact cooling, for safe treatment and patient comfort
- Cost effective with NO disposables

## Warnings and risks:

ResurFX is contraindicated for patients with any concurrent cancer or history of skin cancer, active infection or bacterial diseases. The use of ResurFX could cause redness, swelling, pigmentation change.

See the system user manual for a complete list of contraindications and risks.

# Specifications

## ResurFX™

|                         |  |
|-------------------------|--|
| Wavelength              | 1565 nm  |
| Pulse Energy            | 10-70 mJ per micro-beam  |
| Pulse Characteristic    | CoolScan™ Scanner  |
| Pattern Shapes          | Line, square, rectangle, circle, donut, hexagon                    |
| Beam Density            | Up to 500 micro-beams/cm <sup>2</sup>                              |
| Repetition Rate         | 0.5-2 sec  |
| Tips                    | Sapphire cooled tip & Precision tip                                |
| Spot Size               | Up to 18 mm  |
| Cooling                 | Continuous contact cooling   |
| Dimensions              | 51 x 60 x 42 cm (20.1 x 28.6 x 16.55 inches)                       |
| Weight                  | 22 kg / 48.5 lbs   |
| Electrical requirements | 100 – 240 VAC ±10%, 3A max, 50/60 Hz, single phase, dedicated line |
